

# YASKAWA

# MOTOSim EG-VRC

Powerful Simulation Software

Offline Programming, 3D Simulation,  
Virtual Robot Control

## KEY BENEFITS

- Offline programming of complex systems
- Minimisation of setup, non-productive and commissioning times
- Advanced control functions and simulation of the YASKAWA product family, including robots, gantries, tracks and positioners

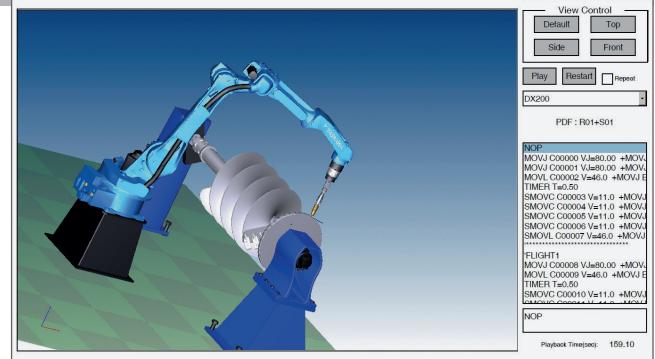

## FURTHER FEATURES

- Comprehensive tool of the digital factory with simulation functions, such as collision detection, reach analysis and cycle time calculation
- Supports numerous process applications, such as arc welding, spot welding, cutting, handling, painting
- Visualisation of the real teach pendant from generation NX100 onwards
- Supports the INFORM programming language
- Complete simulation of the robot software in the PC environment
- Creation of system configurations equivalent to the real controller
- Offline programs can be transferred to the real controller without the need for compilation
- Optimisation of existing robot programs without interrupting production
- Visualisation and calculation of the real robot paths
- Various measurement and analytical tools
- Simple integration of user models into the available YASKAWA model library
- Supports multi-robot and multi-controller simulations
- Control of robots and external axes including synchronous robot motion
- Supported import formats: IGES, STEP, Inventor, ProE/Creo, Solidworks, Catia V5, SAT, Parasolid, HSF, HMF, STL, 3DS, RWX, DXF, WRML and PLY

## Important Functions:

### 3D-PDF

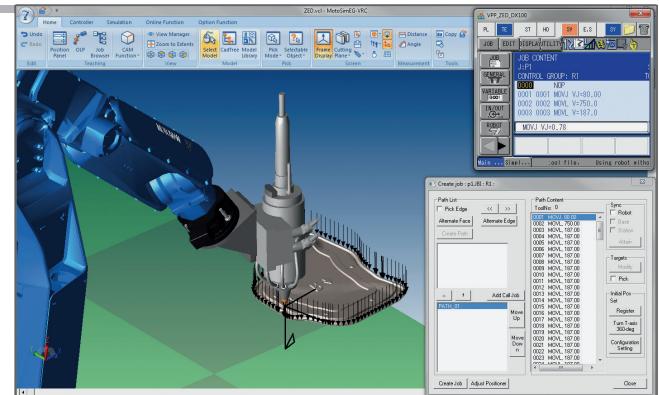

- Simple exporting of simulation result as 3D PDF or AVI file
- Visualisation of the robot layout

3D view file (please open with Firefox or InternetExplorer)  
<http://www.motoman.com/motomedia/MotoSimFile3D.pdf>

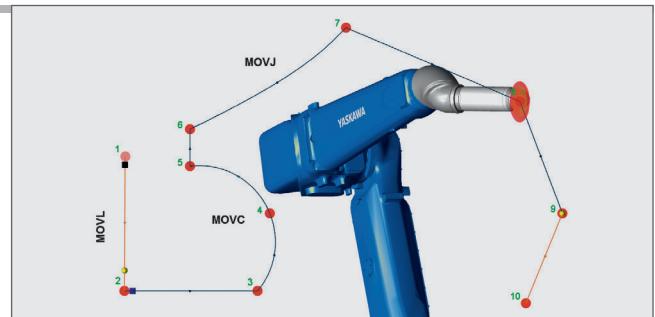

### CAD/CAM

- Automatic path generation on the basis of component surfaces or edges
- Setting of user-defined application parameters
- Generation of complete robot programs
- Jobs can be adapted to changed component positions with minimal effort

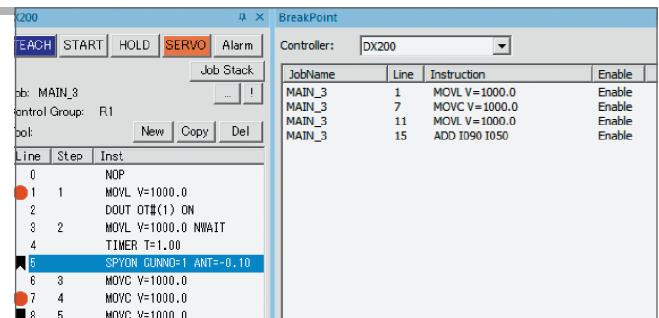

### Visual Path

- Visualisation of the theoretical robot motion (without approximate positioning)
- Points can be shifted or added easily
- Visualisation of different instructions (e.g. TIMER, DOUT, Anticipation, etc.)

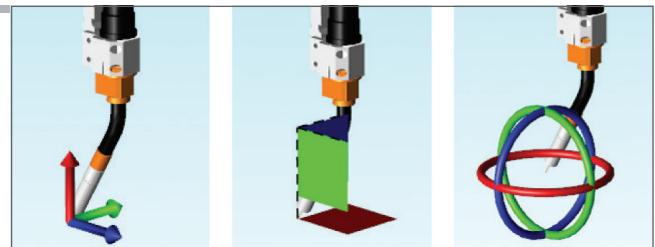

### Debug Function

- Creation of breakpoints (points at which the program is stopped)
- Creation of bookmarks (highlighting of important positions in programs)
- Debug monitor (important variables and inputs/outputs can be monitored)

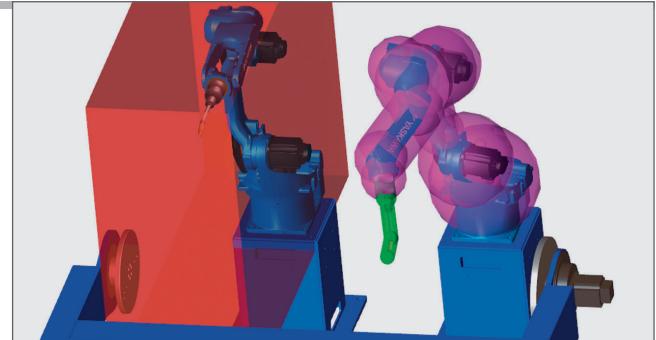

### Handle Display

- Modification of the robot position or movement of individual robot axes by dragging with the mouse

## Functional Safety Unit

- Visualisation of the monitored areas
- Optical check of the FSU settings/parameters

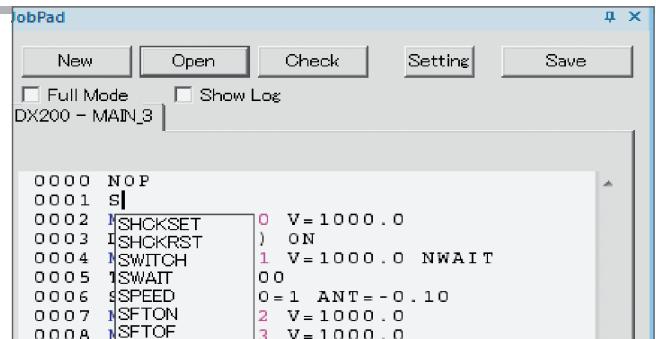

## Search Function (wire search)

- Creation/pre-programming of the search programs
- Complete support of all instructions required for the search function

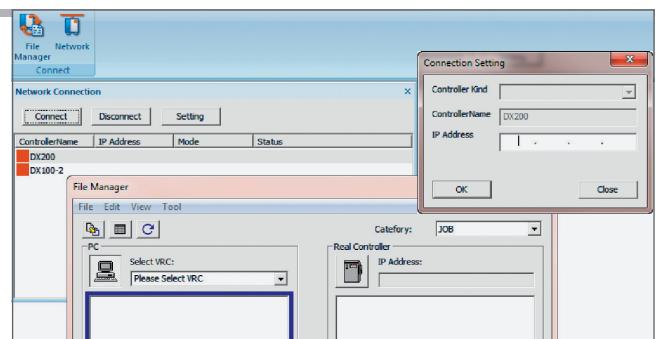

## JobPad

- Writing of jobs with the aid of an optimised text editor
- Syntax check
- Drop-down menu with all enabled instructions

## Network-Funktion

- Ethernet connection to real controller
- Visualisation of robot motions in real time
- Data exchange with integrated file manager (jobs, parameters, etc.)

## System Requirements (Min.)

- Windows® 7 (32 or 64 bit)
- Intel Core 2 Duo or higher
- 2 GB RAM
- 3D graphics card
- 1 GB free space on the hard drive

## YASKAWA Headquarters

YASKAWA Europe GmbH  
 Robotics Division  
 Yaskawastraße 1  
 85391 Allershausen, Germany  
 Tel. +49 (0) 8166/90-0  
 Fax +49 (0) 8166/90-103

## YASKAWA ACADEMY

**and sales office Frankfurt**  
 YASKAWA Europe GmbH  
 Robotics Division  
 Hauptstraße 185  
 65760 Eschborn, Germany  
 Tel. +49 (0) 6196/77725-0  
 Fax +49 (0) 6196/77725-39
