

# DM Series Controller C10-4DM

**New**

**C10-4DM Dimensions**

## Features

- **Simple and easy start up**  
Stroke sensor gain adjustment is not required. Just by selecting a drive unit model at the initial setting stage, necessary parameters are set automatically.
- **Easy operation**  
'Selection Dial' and 'Setting Encoder' allow for easy operation for anyone.
- **Save more space**  
This controller has the same dimensions as C10-5VF/5VFEF and the footprint is reduced by 36% from the previous model.

- **Easy wiring**  
Between a driving unit and a controller are connected by connectors.
- **Energy-saving auto-tuning**  
Auto tuning function reduces power consumption by tracking the resonance point and keeping vibration frequency on it continuously.
- **Electronic control gives optimal vibration**  
Electronic control of horizontal/vertical amplitudes and phase difference provides ideal vibration characteristics for any type of workpiece.
