YOUR PARTNER IN WELDING, DELIVERING INDUSTRIAL THROUGHPUT AND QUALITY.

- Doosan Model Collaborative Robot and Controller and OTC Daihen Welding Hardware.
- Ability to adjust weld parameters and speed during the welding process using the handheld Doosan teach pendant.
- Simply hand guide the robot arm for programming using the Doosan Cockpit.
- Weld up to 2600mm in a straight line with the 1700mm reach model cobot.
- Smooth transitions between curved and straight paths.
- Configuration of reliable and proven technology.
- Suitable for welding aluminium, stainless, mild steel.
- Low spatter pulse inverter welder option.
- Accommodates high-mix, low-volume production.
- Easy to manoeuvre and relocate around workshops.
- Doosan Cobot Model A0912. Pictured with M1013.
